StepAutomation 1.0.5	
<i>Published: 06/06/2022 12:36:19 by Ogtay Garayev</i>	
This module allows administrators, testers to automate sequential steps (configuration based).	
The module provides classes for automating operations. You can also easily extend the module with adding your own custom operations.	
The Module also provides classes for automating Web Page actions over Chrome Web Browser (e.g. navigating, clicking, text adding) and some default methods for this.

PSNotes 0.2.0.1 <i>Published: 06/02/2022 17:10:49 by Matthew Dowst</i> PSNotes is a PowerShell module that allows you to create your own custom snippet library, that you can use to reference commands. It is great for long command you run often or commands you don't run often and need a reminder on. Snippets can either be executed directly, copied to your clipboard, or simply output to the screen for you to do whatever you want with them. When you create a note, you assign an alias to it, so you can have an easy to remember keyword that you can then use to recall it. Notes can also be classified with tags, so you group them in logic collections. You can also easily search for them by tag, name, details, or text within the snippet.	
Downloads: 448	Repository: https://github.com/mdowst/PSNotes
